

BYOx Windows 11 Upgrade Information

Microsoft has announced that it will end support for the Windows 10 platform on October 14, 2025, marking 10 years since its initial release. After this date, Microsoft will no longer provide software updates, technical assistance, security fixes, or support for Windows 10. While PCs running Windows 10 will continue to operate, they may gradually stop functioning with certain systems. *The Department of Education recommends all Windows 10 devices are either upgraded to Windows 11 or replaced by this date.*

Suitability for a device to upgrade to Windows 11 is hardware dependent.

[Click this link for information on the required hardware specifications for Windows 11.](#)

Users can download the free [Microsoft Windows PC Health Check App](#) which will evaluate if a device can be upgraded to Windows 11.

The recommended method to install Windows 11 is through [Windows Update in Settings](#) or you can use the [Windows 11 Installation Assistant](#).
